DETAILED ACTION

1. The amendment filed 4/11/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –,

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 5, 8, 9, and 25-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakamoto. Sakamoto discloses a sheet feeding device that includes a plurality of sheet trays (70, 71, 72, 73); a plurality of sheet feeding means (14) that feed sheets in directions opposite to each other; a plurality of transport paths (17, 19, 20, 21, 23, 24, 25); a primary transport path (5); an interflow position (3); and sheet reversing means (29). The device is capable of operating such that a sheet feeding means from the plurality of sheet feeding means is selected depending on whether sheets are transported in a face-up state on the primary transport path or in a face-down state on the primary transport path.

4. Claims 1, 2, 4, 10, 13-15 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Uchida et al. (JP 2000211804 A). Uchida discloses a sheet feeding device that includes an image forming device (1); a post processing device (40); a plurality of sheet trays (13 above 10, 14) a plurality of sheet feeding means (12, 16) that feed sheets in directions opposite to each other; a primary transport path between the trays (18); a plurality of transport paths (See Fig. 1); and an interflow position (between 12 and 22). The device is capable of operating such that a sheet feeding means from the plurality of sheet feeding means is selected depending on whether

sheets are transported in a face-up state on the primary transport path or in a face-down state on the primary transport path.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 4-6, 8-11, 13-20, and 25-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida et al. (JP 2000211804 A) in view of Sakamoto. Uchida discloses a sheet feeding device that includes a plurality of sheet trays (13 within 10, 14) and a plurality of sheet feeding means (15, 16) that feed sheets from the sheet trays to insert the sheets between two sheets transported from an image formation apparatus (1). The device is capable of operating such that a sheet feeding means from the plurality of sheet feeding means is selected depending on whether sheets are transported in a face-up state on the primary transport path or in a face-down state on the primary transport path. Uchida discloses all the limitations of the claims, but it does not disclose a plurality of sheet feeding means that feed sheets to transport paths in opposite directions. However Sakamoto discloses a sheet feeding device that includes a plurality of sheet feeding means (14) that feed sheets to transport paths (17, 19, 20, 21, 23, 24, 25) in opposite directions of sheet trays for the purpose of feeding sheets in different orientations (see col. 4, lines 15-45). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Uchida by utilizing a plurality of sheet feeding

means that feed sheets to transport paths in opposite directions, as disclosed by Sakamoto, feeding sheets in different orientations.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
